Summary

I am a full-stack developer with mastery of diverse languages (Javascript, Dart, Python) and frameworks, tackling any project phase from conception to completion. My expertise spans databases (SQL, NoSQL), project management, data structures, and electronics, ensuring efficient, dynamic software solutions.

EDUCATION

University of INES-Ruhengeri (2023-2025) **School Address:** Musanze, Rwanda
Rwanda Relevant Coursework: Software Engineering

WORK EXPERIENCE

Full-stack Developer (Full-time) Feb 2024 – Present
Hviewtech Group Kigali, Rwanda

- In my role as a Full Stack Developer, I initially worked as a backend developer for the first three months, focusing on event management projects. During this time, I built APIs and backend logic using Node.js with GraphQL and PostgreSQL, ensuring seamless data management and operations
- I transitioned to working with Next.js for frontend development on various projects. My experience spans building tech solutions for diverse industries, including working on telematics solutions like Sawatelematics and other complex projects. Through these experiences, I contributed to delivering innovative solutions for the tech industry

Full-stack Developer (Full-time) December 2023 – May 2024
Feli Technology (Tech Startup) Sonatube - Kigali - Rwanda

- Collaborated with a team of developers at Felitechnology on the Campy's project, utilizing the MERN stack to build scalable solutions. Additionally, contributed to the FelixExpress e-commerce project, focusing on enhancing functionality and improving the overall user experience.

Apprentice June 2023 – September 2023
Andela Rwanda Kigali, Rwanda

- Built back-end with robust logic and GraphQL APIs, while crafting beautiful and functional UIs at Andela's web dev apprenticeship. Thrived in a collaborative environment.

Trainee : Andela Technical Leadership Program june 2023 – November 2023
Andela Rwanda Kigali, Rwanda

- Hands-on experience building real-world projects under expert guidance. Crafted high-performance APIs for diverse needs, utilizing adaptable skills and a proactive approach to project development

Trainer Feb 2022 – Dec 2022
Digital Technology Skills (Huye Campus)

- Contributing and continued work as a volunteer trainer, providing computer skills training to community members at University of Rwanda Huye Campus.

Trainee : PC MAINTENANCE AND ELECTRONICS JAN 2021 – APRIL 2021
IPRC Tumba(Integrated Polytechnic Regional Center) Musanze Center

. Training through collaborative projects building circuits and repairing devices, gaining valuable hands-on experience in troubleshooting and practical application.
